

How the student's term average is calculated on the report card.

For those of you new to Qualters Middle School and our report card format, we use numerical values instead of letter values. You will also see your child's term average on the report card. Please note this is a course weighted average. Specials and performing arts for a specific period are averaged as a single value before being averaged with the academic subjects into the term average. Sixth grade foreign language is a specials class, while seventh and eighth grade foreign language are a regular academic class.

6th grade example:

Art	87	}	average 90
Computers	93		
Spanish1	98	}	average 97
Spanish2	96		
Language Arts	82		
Math	81		
Science	96		
Social Studies	88		

Student Average $(90+97+82+81+96+88)/6 = 89.0$

7th or 8th grade example:

Music	91	}	average 88
PE1	85		
French	93		
Language Arts	88		
Math	88		
Science	86		
Social Studies	87		

Student Average $(88+93+88+88+86+87)/6 = 88.33$

You may refer to the student handbook on pages 14 and 15 in your child's agenda book for further clarification. The student handbook may also be accessed through the Mansfield Public Schools website: www.mansfieldschools.com **select *Qualters Middle School* then *Student Handbook*.**

The Honor Roll will be posted to the Qualters Middle School website within two weeks of report card distribution. **Select *Qualters Middle School* then *Honor Roll*.**
