

USE OF SCHOOL FACILITIES

It shall be the policy of the Mansfield School Committee to permit the indoor and outdoor use of school facilities by community groups and organizations when such use does not interfere with the needs of school programs and requirements for student learning. This use will be subject to such administrative regulations and limitations as may be prescribed and when such use is not so excessive as to infringe upon the proper maintenance of these facilities. The Mansfield School Committee has full jurisdiction and responsibility for the proper monitoring and has full protection of all indoor and outdoor school facilities which have been approved for educational purposes by Town Meeting, the Department of Education, and the School Building Assistance Bureau.

The Superintendent or his/her designee is authorized to grant approval for the indoor and outdoor use of school facilities or to reject applications which fail to meet the criteria established for such use as established by the Mansfield School Committee.
